## CSE 101 Slide Set 10

Doç. Dr. Mehmet Göktürk  
Department of Computer Engineering

[www.dtu.edu.tr](http://www.dtu.edu.tr)

1

---

## Database Systems

- Database Fundamentals
- The Relational Model
- Object-Oriented Databases
- Maintaining Database Integrity
- Traditional File Structures
- Data Mining
- Social Impact of Database Technology

[www.dtu.edu.tr](http://www.dtu.edu.tr)

2

---

## Database

A collection of data that is multidimensional in the sense that internal links between its entries make the information accessible from a variety of perspectives

[www.dtu.edu.tr](http://www.dtu.edu.tr)

3

---

## A file versus a database organization

**a. File oriented information system**

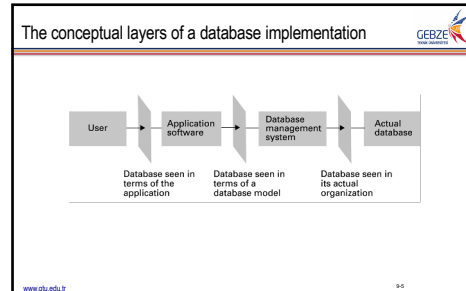

**b. Database oriented information system**

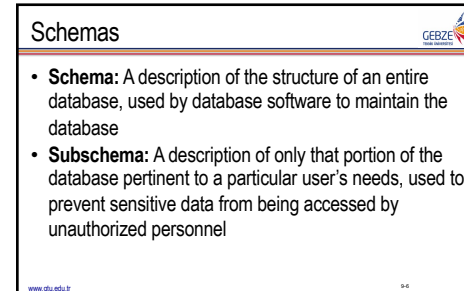

[www.dtu.edu.tr](http://www.dtu.edu.tr)

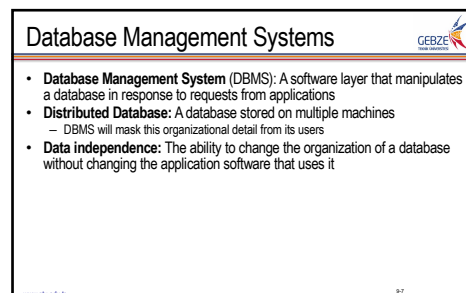

4

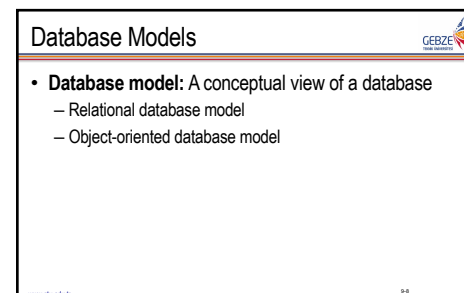

5

6

7

8

### Relational Database Model

- **Relation:** A rectangular table
  - **Attribute:** A column in the table
  - **Tuple:** A row in the table

www.dtu.edu.tr 9-9

9

### A relation containing employee information

Empl Id	Name	Address	SSN
25X15	Joe E. Baker	33 Nowhere St.	111223333
34Y70	Cheryl H. Clark	563 Downtown Ave.	999009999
23Y34	G. Jerry Smith	1555 Circle Dr.	111005555
.	.	.	.
.	.	.	.

www.dtu.edu.tr 9-10

10

### Relational Design

- Avoid multiple concepts within one relation
  - Can lead to redundant data
  - Deleting a tuple could also delete necessary but unrelated information

www.dtu.edu.tr 9-11

11

### Improving a Relational Design

- **Decomposition:** Dividing the columns of a relation into two or more relations, duplicating those columns necessary to maintain relationships
  - **Lossless** or **nonloss** decomposition: A "correct" decomposition that does not lose any information

www.dtu.edu.tr 9-12

12

### A relation containing redundancy

Empl Id	Name	Address	SSN	Job Id	Job Title	Skill Code	Dept	Start Date	Term Date
25X15	Joe E. Baker	33 Nowhere St.	111223333	F5	Floor manager	FM3	Sales	9-1-2007	9-30-2008
25X15	Joe E. Baker	33 Nowhere St.	111223333	D7	Dept. head	K2	Sales	10-1-2008	*
34Y70	Cheryl H. Clark	563 Downtown Ave.	999009999	F5	Floor manager	FM3	Sales	10-1-2007	*
23Y34	G. Jerry Smith	1569 Circle Dr.	111005555	S25X	Secretary	T5	Personnel	3-1-1999	4-30-2006
23Y34	G. Jerry Smith	1569 Circle Dr.	111005555	S26Z	Secretary	T6	Accounting	5-1-2006	*
*	*	*	*	*	*	*	*	*	*
*	*	*	*	*	*	*	*	*	*

[www.cba.edu.tr](http://www.cba.edu.tr) 9-13

13

### An employee database consisting of three relations

Empl Id	Name	Address	SSN
25X15	Joe E. Baker	33 Nowhere St.	111223333
25Y15	Cheryl H. Clark	563 Downtown Ave.	999009999
23Y34	G. Jerry Smith	1569 Circle Dr.	111005555

Job Id	Job Title	Skill Code	Dept
S25X	Secretary	T5	Personnel
S26Z	Secretary	T6	Accounting
F5	Floor manager	FM3	Sales
*	*	*	*
*	*	*	*

Empl Id	Job Id	Start Date	Term Date
23Y34	S25X	3-1-1999	4-30-2006
25Y15	F5	10-1-2007	*
23Y34	S26Z	5-1-2006	*
*	*	*	*
*	*	*	*

[www.cba.edu.tr](http://www.cba.edu.tr) 9-14

14

### Finding the departments in which employee 23Y34 has worked

Empl Id	Name	Address	SSN
25X15	Joe E. Baker	33 Nowhere St.	111223333
25Y15	Cheryl H. Clark	563 Downtown Ave.	999009999
23Y34	G. Jerry Smith	1569 Circle Dr.	111005555
*	*	*	*

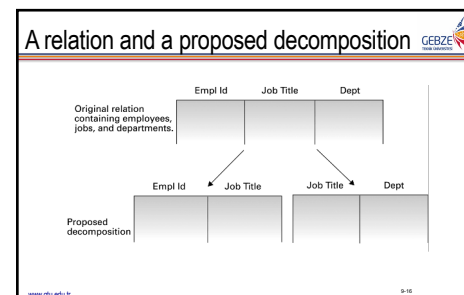

Job Id	Job Title	Skill Code	Dept
S25X	Secretary	T5	Personnel
S26Z	Secretary	T6	Accounting
F5	Floor manager	FM3	Sales
*	*	*	*
*	*	*	*

Empl Id	Job Id	Start Date	Term Date
23Y34	S25X	3-1-1999	4-30-2006
25Y15	F5	10-1-2007	*
23Y34	S26Z	5-1-2006	*
*	*	*	*
*	*	*	*

The jobs held by employee 23Y34 are:

[www.cba.edu.tr](http://www.cba.edu.tr) 9-15

15

16

## Relational Operations

- **Select:** Choose rows
- **Project:** Choose columns
- **Join:** Assemble information from two or more relations

www.dtu.edu.tr

9-17

17

## The SELECT operation

www.dtu.edu.tr

9-18

18

## The PROJECT operation

www.dtu.edu.tr

9-19

19

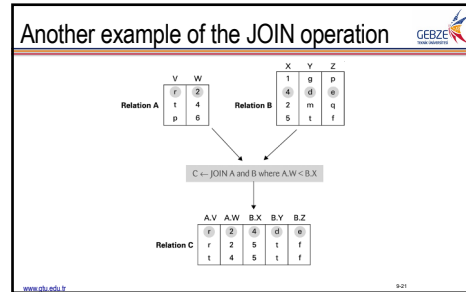

## The JOIN operation

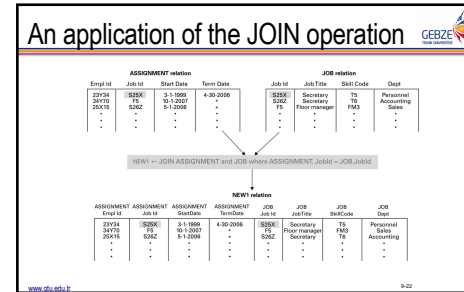

www.dtu.edu.tr

9-20

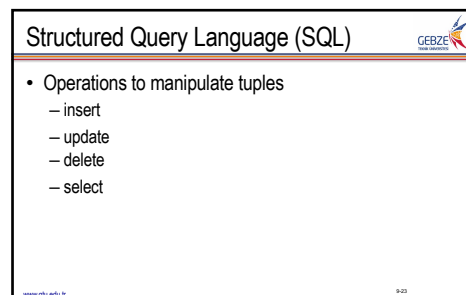

20

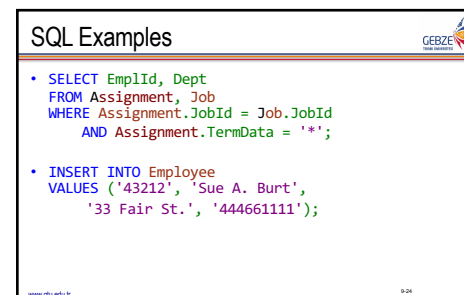

21

22

23

24

### SQL Examples (continued)

- `DELETE FROM Employee`  
`WHERE Name = 'G. Jerry Smith';`
- `UPDATE Employee`  
`SET Address = '1812 Napoleon Ave.'`  
`WHERE Name = 'Joe E. Baker';`

www.dtu.edu.tr 9-25

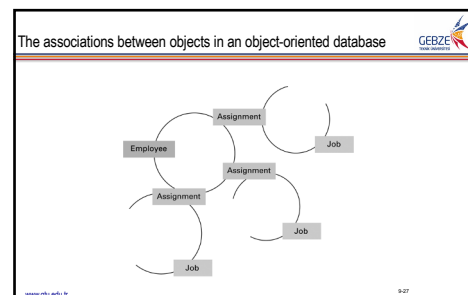

25

### Object-oriented Databases

- **Object-oriented Database:** A database constructed by applying the object-oriented paradigm
  - Each entity stored as a persistent object
  - Relationships indicated by links between objects
  - DBMS maintains inter-object links

www.dtu.edu.tr 9-26

26

27

### Advantages of Object-oriented Databases

- Matches design paradigm of object-oriented applications
- Intelligence can be built into attribute handlers
- Can handle exotic data types
  - Example: multimedia

www.dtu.edu.tr 9-28

28

### A function for merging two sequential files

```

def MergeFiles (InputFileA, InputFileB, OutputFile):
    if (both input files at EOF):
        Stop, with OutputFile empty
    if (InputFileA not at EOF):
        Declare its first record to be its current record
    if (InputFileB not at EOF):
        Declare its first record to be its current record
    while (neither input file at EOF):
        Put the current record with the "smaller" key field value in OutputFile
        if (that current record is the last record in its corresponding input file):
            Declare that input file to be at EOF
        else:
            Declare the next record in that input file to be the file's current record
    Starting with the current record in the input file that is not at EOF,
    copy the remaining records to OutputFile
  
```

www.dtu.edu.tr 9-33

33

### Applying the merge algorithm

(Letters are used to represent entire records.)

The particular letter indicates the value of the record's key field.)

www.dtu.edu.tr 9-34

34

### Indexed Files

- Index:** A list of key values and the location of their associated records

www.dtu.edu.tr 9-35

35

### Opening an indexed file

www.dtu.edu.tr 9-36

36

## Hashing

- Each record has a key field
- The storage space is divided into **buckets**
- A **hash function** computes a bucket number for each key value
- Each record is stored in the bucket corresponding to the hash of its key

www.dtu.edu.tr 9-37

37

www.dtu.edu.tr CSE 101 Slide Set 10 38

38

## Hashing the key field value 25X3Z to one of 41 buckets

Key field value:	25X3Z
ASCII representation:	0011001000110101010110000011001101011010
Equivalent base ten value:	215,643,337,562
Remainder after division by 41:	3
Bucket number:	3

www.dtu.edu.tr 9-39

39

## The rudiments of a hashing system

Remainders

When divided by 41, the key field values of 14, 55, and 98 each produce a remainder of 14. Thus these records are stored in bucket 14.

Buckets in mass storage

www.dtu.edu.tr 9-40

40

### Collisions in Hashing

- **Collision:** The case of two keys hashing to the same bucket
  - Major problem when table is over 75% full
  - Solution: increase number of buckets and rehash all data

www.dtu.edu.tr

9-41

41

### Data Mining

- **Data Mining:** The area of computer science that deals with discovering patterns in collections of data
- **Data warehouse:** A static data collection to be mined
  - **Data cube:** Data presented from many perspectives to enable mining

www.dtu.edu.tr

9-42

42

### Data Mining Strategies

- Class description
- Class discrimination
- Cluster analysis
- Association analysis
- Outlier analysis
- Sequential pattern analysis

www.dtu.edu.tr

9-43

43

### Social Impact of Database Technology

- Problems
  - Massive amounts of personal data are being collected
    - Often without knowledge or meaningful consent of affected people
  - Data merging produces new, more invasive information
  - Errors are widely disseminated and hard to correct
- Remedies
  - Existing legal remedies often difficult to apply
  - Negative publicity may be more effective

www.dtu.edu.tr

9-44
